EXECUTIVE ORDER No. 31

WHEREAS, The economy of southern New Jersey is seriously depressed, with unemployment reaching extreme and extraordinary levels;

WHEREAS, This economic emergency may be partially alleviated by a lowering of fuel costs through the authorization of increased maximum sulfur content in fuel;

WHEREAS, An interim study of the ambient air quality in Salem county and portions of Cape May county indicates that such an increase is feasible for certain facilities without threatening the public health, safety or welfare; and

WHEREAS, Such study establishes that existing air quality standards can be met by changing the requirements for sulfur content in fuel;

Now, THEREFORE, I, Brendan T. Byrne, Governor of the State of New Jersey, hereby order and direct the Commissioner of Environmental Protection to implement less stringent sulfur-in-fuel requirements for sources in Salem county and such other counties where studies demonstrate a similar potential consistent with the public health, safety and welfare. These standards shall be adopted on an interim basis, until the detailed implementation plan analyses for the New Jersey Intrastate Air Quality Control Region and the Metropolitan Philadelphia Air Quality Control Region, which are now underway, can be completed.

Given, under my hand and seal this 12th day of
[SEAL] March, in the year of our Lord, one thousand nine hundred and seventy-six, of the Independence of the United States, the two hundredth.
